

HARTMANN

Helps. Cares. Protects.

CombiSet[®]

All you need –
ready to use
at your fingertips

More
efficiency
and safety
in the OR

- ✚ Customizable OR packs
to streamline your surgical processes
- ✚ Produced and sterilized in the EU
- ✚ Smart and easy packaging solutions

CombiSet®

Optimize flow and increase safety along the patient journey

CombiSet® is the easy-to-use solution to help optimize surgical outcomes. The sterile packs are expertly tailored to enhance your pre-, intra- and postoperative phases, ensuring improved efficiency, time saving, and support in reducing the risk of infection. Building on 25 years of experience in intervention sets, HARTMANN's CombiSets successfully merge products, service and advice in one holistic solution and are constantly enhanced with high-value components.

More customization

- Configure your sets to fit your unique needs, guided by our expert surgical consultants
- Select from over 3000 items, incl. high-value components

More efficiency in your OR

- Standardizes and simplifies procedures
- Speeds up OR prep to enable more interventions
- Cuts down procedure time and costs
- Supports and simplifies documentation

More time for the patient

- Precisely the components you need
- Eliminates single-packed tools from varied sources
- Frees up time for patient care

More safety for everyone

- Reduces handling errors vs. single-packed items
- Supports in reducing cross-contamination and healthcare related infections

Balancing sustainability with modern healthcare needs, HARTMANN focuses on resource-friendly products and processes without compromising on efficiency, patient outcomes, and supply reliability.

CombiSet® Sustainability

End-to-end measures reduce waste & emissions

Improved waste management ✓

- All essentials for an OR procedure in one sterile set:
- Fewer individual packagings
 - Significantly reduces waste

High-quality, EU production ✓

- CombiSet procedure packs and ventbags are produced, packed and sterilized in the EU:
- Reduces transport CO₂ emissions

Resource-saving bulk transport ✓

- 93% of set components transported as bulk:
- Reduces plastic waste, transport volume and the number of sterilization processes

Efficient packaging ✓

- Cartons made of 100% recycled paper without chloride bleaching
- Fits 17% more products on each pallet = less trucks on the road*

* data on file

The CombiSet® ventbag, our sterile barrier system, is carefully designed to maintain sterility, effectively supporting in combating Healthcare Associated Infections (HAI). Developed with OR teams in mind, it combines intuitive usability with safety.

Ventbag

Simplicity meets uncompromised sterility

Quality assurance

In-house production in Europe ensures end-to-end quality control and dependable supply.

Sterile barrier system

Ensures secure sterility with a simple design, facilitating easy access while maintaining uncompromised safety.

Quick access

Opening with a marked tear strip accessible from either side, ensuring immediate and easy access – vital during surgical preparation.

Optimal grip

Non-slip exterior ensures stability during storage and transport, while the smooth interior facilitates easy product removal.

Robust construction

Made from durable Polyethylene film with a strong seal to ensure sterility.

Precision-focused content

Components meticulously organized to be unpacked in the exact order required, safeguarding sterility throughout the process.

Color Coding

Enhance OR efficiency and CombiSet® storage

In surgery, having the right equipment at the right time is crucial. Simplify your OR procedures and optimize set storage with customized color coding.

Custom color coding

- Create your individual CombiSet® sticker with colors and content of your choice
- 14 vibrant colors to choose from
- Each single set individually customizable

OR and storage efficiency

- Simplify set storage, picking and OR preparation
- Easily identify procedure sets
- Avoid complications and costs from picking the wrong set
- Optimize OR room efficiency by reducing preparation time

Simplified inventory

- Improve documentation and inventory management with QR codes (compatible with standard scanners)
